## Dielectric - Wikipedia

Terminology. Although the term insulator implies low electrical conduction, dielectric typically means materials with a high polarizability. The latter is expressed by a number called the relative permittivity. The term insulator is generally used to indicate electrical obstruction while the term dielectric is used to indicate the energy storing capacity of the material (by means of polarization).

## Film capacitor - Wikipedia

Thu, 11 Oct 2018 08:11:00 GMT

Film capacitors, plastic film capacitors, film dielectric capacitors, or polymer film capacitors, generically called "film caps" as well as power film capacitors, are electrical capacitors with an insulating plastic film as the dielectric, sometimes combined with paper as carrier of the electrodes.. The dielectric films, depending on the desired dielectric strength, are drawn in a special ...
