## Do free energy magnetic motors really work?

*But in reality, it is the magnetic energy that is being used to put the motor into motion and over a period of time, the magnets will lose their magnetism and the motor will stop. But again, all one needs to do is replace the magnets and the motor will be workable once again.*

## Magnet Motor Free Energy Generator: Do they Really Work?

Thu, 11 Oct 2018 23:13:00 GMT

*The magnetic energy that is used to run a motor over time does not require an outside energy source to generate electricity like the sun or water. It is running purely on the magnet arrangement. However, over time, the magnets can lose their magnetism, so they will have to be replaced at some point to continue to generate electricity.*
